## Megan fox news today

It is not news to point out that this year has brought with it a revival of and newfound appreciation for the early and middle aughts, especially the beauty of the era and fashion signatures. Already, we've seen amazing reimagined take on Juicy Tubes, chunky highlights, and Chihuahua-sized purses (though we may have to draw lines at ultra-low-rise jeans). A big trend making a steady revival back into the beauty strata is something significant enough to change your entire look, but accessible enough for anyone to try: we're talking about thinner, more angular eyebrows inspired by femme sultry '00s fatales like Megan Fox. We spoke to two of the world's top eyebrow artists to find out everything we can about this trend, from knowing whether shapes fit your face to exactly what to ask for at the salon. Here's your full guide to '00s-style, Megan Fox eyebrows: The last 10 years have been ruled by thick, eyebrows popularized by stars like Cara Delevingne and Lily Collins. Considered a lower maintenance version of the super skinny eyebrows of the new millennium, fuller eyebrows are described as youthful, making statements and a bit bohemian. But the trend of full eyebrows is not optimal for every face. Not to mention, not everyone can grow bushy eyebrows. Enter: So-called Megan Fox eyebrows. They're curvy, coy, mysterious, a little dangerous. Think Bond movie bombshell who double-crosses him in the end. If you've spent any time on TikTok or Twitter, you've probably seen legions of young Y2K fans share supercuts of their favorite movies, actresses, and aesthetics, with Megan Fox ruling supreme. The comments praised Fox's acting and style, but there's one super-fixed feature of everyone: high dramatic eyebrows. Before you lift nary a tweezers are also not wax strips, though, judging your own face shape, eyes, and bone structure to establish if Megan Fox eyebrows are the way to go. Angled eyebrows are great on rounder or fuller face shapes, says Malynda Boom Boom Vigliotti, master eyebrow artist and owner of NYC Boom Boom Brow Bar, explaining that style can balance features and create more pleasant proportions. On the contrary, they can read as harsh or even angry on a thinner or more angular face, she told Byrdie exclusively. I would think to myself, 'Will this style balance my natural features if I don't wear any makeup?' It's also important to take stock of your current eyebrows and think about how they'll translate into a new style. Azi Sacks, eyebrow expert at Hawthorne Studio, stresses that people with patchy or sparse heads may require more comfortable style makeup. When judging, Sacks told Byrdie, I'm going to think of myself. 'Will this style balance my natural features if I don't wear makeup?' A thicker, dense and wider eyebrow is a better candidate for this style. Sacks and Boom Boom experts both agree that breaking into femme fatale eyebrows is probably best left for an expert review the nature of the arches is more important. According to Boom Boom, the key to any perfect eyebrow shape is that symmetry can be difficult to measure on your own face. If you've ever tried to even out-line winged just to end up with it completely crossing your lid, you know exactly what she means. Plus, experts are med secretive to things many of us won't recognize. Most people think that when they remove hair in the front part of the eyebrow bone, they're creating a better arch, Boom Boom said. In return, they make 'rainbows.' We spend a lot of time at Boom Boom showing people what they need to grow and how they can achieve a stronger angle. Personally, Boom Boom prefers to work with wax for a cleaner feel and even grow an indoor line of low-temperature waxes built with soothing plants to soothe sensitive skin. Boom Boom Brow Bar Flash Wax 6-Pack \$96 Store At the Salon, requires pronounced curves and a very sharp, defined shape, Azi Sacks said. Communication is key, so don't be afraid to bring visual references and photos to make sure you can explain exactly what you're aiming for. If there is no way to make it into an eyebrow pro, Boom Boom has a few difficult and quick rules to consider before heading to town on your own eyebrows: shape with a pencil in front of a regular mirror first, and then tweeze in an exaggerated mirror. Trying to shape too enlarged eyebrows can lead to un natural shapes or accidental over-strength. Once your eyebrows are shaped the way you like them, it's time for the really fun part: makeup. If you find yourself using a lot of products, Sacks says to look at dyed eyebrows at a salon. Too much makeup at the eyebrows or heavy products makes the eyebrows fall off, she explains. It's better to lift heavy hands than a color than potentially make your own eyebrows even sparser with thick cream and hard gel. Gently applying cold pressed castor oil can lead to eyebrow growth, Sacks said, and recommend it to all customers. Ricinoleic Acid, which includes nearly 90 percent castor oil, is commonly used to target hair loss and patchwork. For the most natural look, Sacks proposes a simple eyebrow powder and angular brush to fill the void. Try Laura Mercier's Face Powder Sketch & Intensity Pomade and Brow Powder Duo (\$28) for a soft, full eyebrow that never looks overwhelmed by the product. Sacks likes to follow up with a gentle eyebrow setter like Chantecaille Full Brow Perfecting Gel (\$40) to keep the fur in place. It's a fun thing later this year to think about changing your eyebrows, Boom Boom optimism points out. They are also expressly, so I feel like they can help us communicate with our masks on and hopefully spread some love. Ten months after birth Son, Noah, Megan Fox is pregnant again! (Maybe she's at least three months along since she made the announcement.) Jessica Simpson's daughter Maxwell was just seven months old when mompreneur announced she was pregnant again with son Ace. Jessica admits her son was a surprise, but Megan has said she always wanted a big family, so she can plan her pregnancy this time so that her children are close in age. Experts advise a woman to wait at least 18 months before becoming pregnant again so that the body returns to its pre-birth shape and prepares for another pregnancy. But many mothers swear by giving their children closeness about age, known as baby bundles. That way, parents can get all those tough years out of the way at the same time. You're still accustomed to changing diapers and running on sleep to no, so it's less shocking to your system. Bonus: since the youngest person is still too young when baby #2 appears, it is less likely that he/she will be jealous, or have the famous siblings competition a lot of worried parents. Soon, they will also be enjoying the same activities, so you do not have to entertain separately for each of them. And they will be going to the same school at the same time in a few years, which makes it convenient for pick-ups and drop-offs. In addition, many daycares and classes offer discounts to siblings, so it's a saving of money too. Talking about money, strollers, car seats, clothes - everything is very expensive. So it is nice that you can recycle the cake easily without having it sitting in storage for years, taking up space. And for working mothers, it's great that it only takes a long vacation to have children instead of having their careers interrupted a few times, which can make it harder to climb the corporate ladder. Of course one of the biggest drawbacks of having children close in age is your sanity! You will have more stress and less sleep! But if you don't get too overwhelmed, there are plenty of advantages to go the way of Jessica and Megan. TELL US: What do you think is the ideal age among children? Megan Fox may be kindcast as the bodacious brunette in impossibly over-the-top action flicks but have you ever considered that there can only be brains behind beauty? Like, the brain of marine biology. Acer, which previously allowed Keifer Sutherland to escape this explosive heroic character and pursue his passion for cupcakes, casts Fox as a gentle smartie-soul longing to meaningfully communicate with dolphins. On the spot, a distracted Fox brushed off a script pitch involving her being in space in her green suit. Instead, she pursued a passion for working with marine wildlife. The first stop, freeing the lobsters bound in the aquarium of the restaurant. Campaign for Acer's Ultrabook feature encourages users to explore beyond their limits. Fox inspired a crew of slack-jawed and lady-scared marine scientists to do whatever the hell she asked of them, which included a complex process of teaching and decrypt a dolphin's contact information. After 103 days of voice training, bedtime reading, software recalibrating and fawning your coos are brilliant. Xenia Dolphins have finally been understood in English terms. Megan Fox beamed, the crew celebrated, and the congratulatory hugs and handshakes lasted just a little too long. As part of Acer's ongoing launch of new products, the spot-from-agency Mother London and director Ivan Zacharias-is an endearing ode to the possibility. And it almost makes you believe that Megan Fox missed her call. All right, no. Really.
